

CS631 008 - Data Management Systems Design

Woody's Automotive Online Application Project

Final Project Phase -3

Deliverable – 3

Professor Mr. Michael Renda

Team Number:10

Pavithra Bobbala (pb543)

Damodhar Mahidhar Tanniru (dt378)

Gayatri Aavula (ga348)

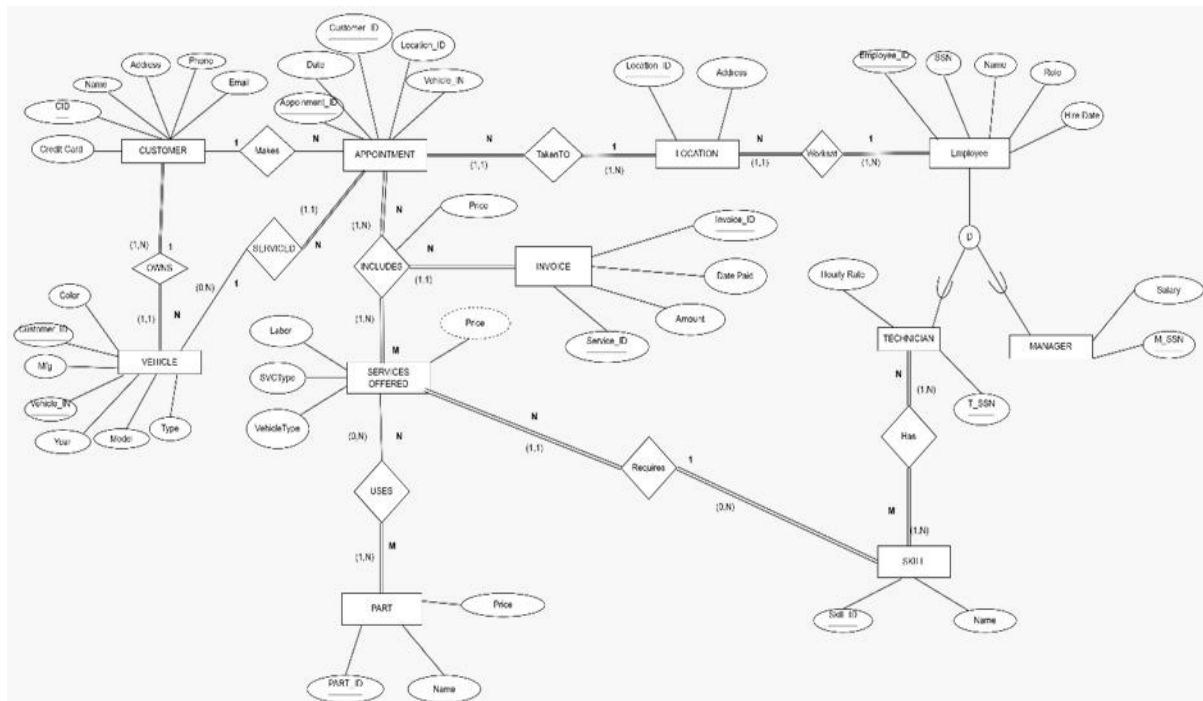

Goal of this project:

The purpose of this project is to provide a user-friendly application program interface for Woodys Automotive. We built a full-stack application with Angular JS, Node JS and xampp for database generation. To hold our data, we constructed 5 database tables for Appointment, Employee details, location details, login details, vehicle details.

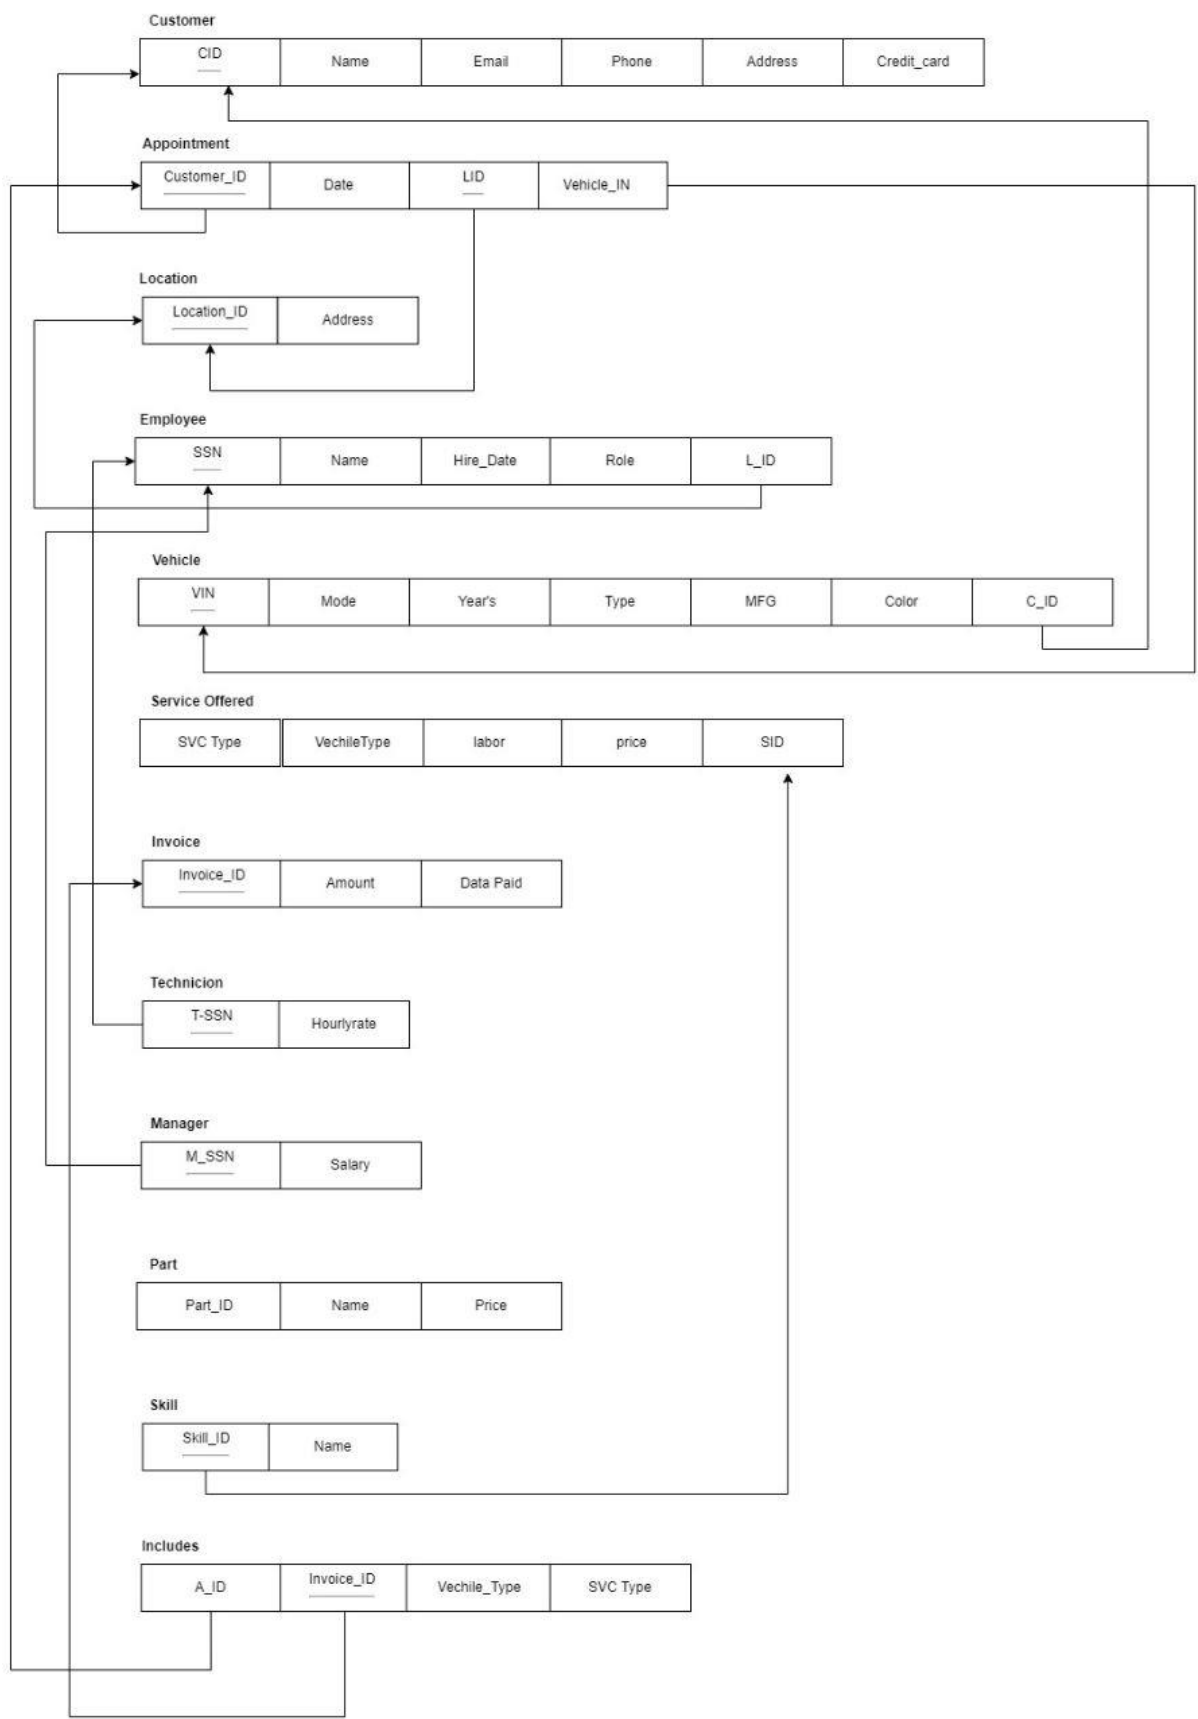

Problem Faced:

- We were unable to build the payment portal utilizing credit cards due to technical difficulties and hence eliminated it.
- We ran into problems when we lost connections between our project's code and the database, resulting in incorrect and, in some cases, no output at all.

EER Diagram:

SCHEMA DIAGRAM:

User Guide:

1. Our application begins on our website's homepage, where we are asked to pick between admin page and login page.
2. Login page goes to the login or register page, where a customer can register if they are new to the website.
3. Then redirects back to the login page.
4. Now the users can sign in and the customer register form appears.
5. In the right corner, vehicle customer drop down will appear in that we can click on vehicle registration for register the vehicle.
6. Details have to be entered in the vehicle registration page if they are new users to the service.
7. After the details entered, a pop up appears as vehicle registered successfully.
8. After registering the vehicles, customers can book the service appointment and they can check the prices of each service type.
9. On the admin side, manager will login to the admin page.
10. Admin page will show that the manager will choose to assign a vehicle to the employee
11. Manager will update the tickets after the task is assigned, in progress and completed.

SQL COMMANDS FOR CREATION OF TABLES:

Employee Details Table:

```
CREATE TABLE employee_details  
( EID INT(10) AUTO_INCREMENT,  
SSN VARCHAR(20),  
employee_Name VARCHAR(20),  
employee_Role VARCHAR(20),  
hire_date DATE,  
LID INT(10),  
PRIMARY KEY (EID));
```

Login Details Table:

```
CREATE TABLE logindetails  
(CID INT(10) AUTO_INCREMENT,  
firstname VARCHAR(20),  
lastname VARCHAR(20),  
role VARCHAR(20),  
email VARCHAR(20),  
password VARCHAR(20),  
phone INT(10),  
creditcard VARCHAR(20),  
address TEXT,  
PRIMARY KEY (CID));
```

Vehicle Details Table:

```
CREATE TABLE vehicle_details  
( color VARCHAR(20),  
model VARCHAR(20),  
year INT(20),  
vehicle_In VARCHAR(20),  
mfg VARCHAR(20),  
type INT(10),  
CID INT(20),  
PRIMARY KEY (vehicle_In));
```

Location Details:

```
CREATE TABLE location_details  
( LID INT(10) AUTO_INCREMENT,  
location_address TEXT,  
PRIMARY KEY (LID)  
);
```

Appointment Table:

```
CREATE TABLE appointment  
( AID INT(10) AUTO_INCREMENT,  
appointment_date VARCHAR(20),  
vehicle_In VARCHAR(20),  
status VARCHAR(20),
```

servicetype VARCHAR(100),

assignto VARCHAR(20),

LID INT(10),

CID INT(10),

PRIMARY KEY (AID));

SQL QUERIES FOR POPULATION OF TABLES:

Employee Table:

The screenshot shows the phpMyAdmin interface for a database named 'woodys'. The 'employee_details' table is selected, and its structure is displayed. The table has the following columns: EID, SSN, employee_Name, employee_Role, hire_date, and LID. The data is shown in a table with 4 rows. The interface also includes a sidebar with a tree view of the database structure, a top menu bar with options like Browse, Structure, SQL, Search, Insert, Export, Import, Privileges, Operations, Tracking, and Triggers, and a bottom section for query results operations.

EID	SSN	employee_Name	employee_Role	hire_date	LID
1	26836	vamshi	waterwash	2023-02-23	1
2	26837	gayatri	engineoil	2023-02-07	5
3	26838	sai	AC Repair	2023-02-23	2
4	26839	shiva	All	2023-02-23	1

Appointment Table:

The screenshot shows the phpMyAdmin interface for the 'appointment' table. The left sidebar displays the database structure, including 'appointment' and its columns: 'AID (PRI, int)', 'appointment_date (int)', 'assignto (varchar)', 'CID (int)', 'servicetype (varchar)', 'status (varchar)', and 'vehicle_in (varchar)'. The main panel shows the table's data with columns: AID, appointment_date, vehicle_in, status, servicetype, assignto, LID, and CID. The table contains 13 rows of data.

AID	appointment_date	vehicle_in	status	servicetype	assignto	LID	CID
1	2023-04-26	TS36M2890	inprogress		vamshi	1	1
2	2023-04-27	AP10AL8081	inprogress	water wash + engineoil		5	1
3	2023-04-29	TS36M3000	inprogress	engineoil		3	1
4	2023-04-29	TS36M2890	inprogress			0	0
5	2023-04-29	USA4000	close	water wash + engineoil + AC Repair		1	1
7	2022-11-30	test	inprogress	water wash	Gayatri	3	1
9	2023-04-29	Test	inprogress			0	0
10	2023-04-03	Test2	inprogress	waterwash	mahidar	4	1
11	2023-04-29	Test3	inprogress	wash+engineoil+AC	Gayatri	1	1
12	2023-04-30	Test2	inprogress	waterwash		3	1
13	2023-04-27	Test3	inprogress	waterwash		4	1

Login Details Table:

The screenshot shows the phpMyAdmin interface for the 'login_details' table. The left sidebar displays the database structure, including 'login_details' and its columns: 'CID', 'firstname', 'lastname', 'role', 'email', 'password', 'phone', 'creditcard', and 'address'. The main panel shows the table's data with columns: CID, firstname, lastname, role, email, password, phone, creditcard, and address. The table contains 3 rows of data.

CID	firstname	lastname	role	email	password	phone	creditcard	address
1	Ambiyada	Vamshi	customer	vamshishiva a@gmail.com	V@msh123	7093942	0	India
2	gayatri	a	manager	sai@gmail.com	S@123	91821281	0	NY
3	sumanth	reddy	manager	12345		12345	0	0

Vehicle Details Table:

The screenshot shows the phpMyAdmin interface for the 'vehicle_details' table. The table structure is as follows:

color	model	year	vehicle_in	mfg	type	CID
						1
merun	alto	2007	AP23AL8109	Hyderabad	5	1
Dark Glavano	2023	2022	TS36M2980	SIDDIPET	2	1

The interface also shows the SQL query: `SELECT * FROM `vehicle_details`` and various options for displaying and exporting the data.

Location Details Table:

The screenshot shows the phpMyAdmin interface for the 'location_details' table. The table structure is as follows:

LID	location_address
1	India
2	NewYork
3	Australia
4	Iran
5	USA

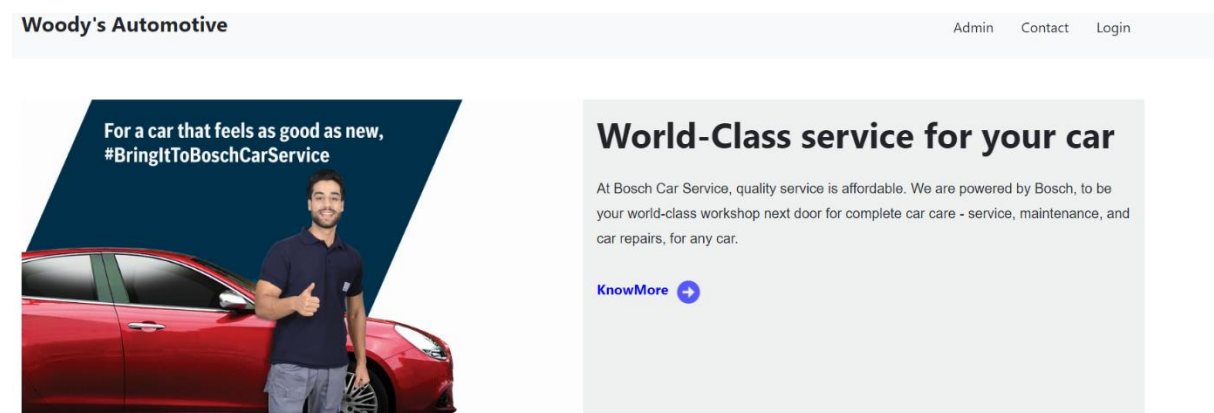

The interface also shows the SQL query: `SELECT * FROM `location_details`` and various options for displaying and exporting the data.
